

STANLEY ANIGBOGU

LightEd

2024 Global Fellow

BIG BOLD IDEA

Reduce energy poverty and environmental degradation in underserved communities in Nigeria by converting electronic and plastic waste into sustainable, solar-powered solutions.

ORGANIZATION OVERVIEW

LightEd envisions a future where everyone can access clean, affordable energy, contributing to a greener, more sustainable world. With a focus on underserved communities, LightEd's approach addresses immediate energy needs and promotes environmental conservation and economic empowerment across Nigeria.

LightEd reduces energy poverty and environmental degradation by transforming electronic and plastic waste into sustainable, solar-powered energy solutions through innovative recycling and renewable energy projects.

PERSONAL BIO

Stanley Anigbogu is the founder of LightEd, an organization dedicated to reducing energy poverty and reversing environmental degradation by repurposing electronic and plastic waste into renewable energy solutions. Before establishing LightEd, Stanley was deeply involved in environmental activism and technological innovation, driven by a passion for sustainable development and social equity. His journey reflects a profound commitment to leveraging technology for social good. Stanley's work meaningfully improves environmental sustainability and community empowerment. In recognition of his work, Stanley has received several awards, including the UN-Habitat Scroll of Honor. He is also a winner of the World Bank Group Pitch Competition.
