BIG BOLD IDEA

Drive environmental and social regeneration in marginalized communities by building strategic, lasting relationships among funders and local climate leaders.

ORGANIZATION OVERVIEW

Impact Experience catalyzes investors, philanthropists, entrepreneurs, and community leaders to build strategic partnerships and develop solutions to pressing social and environmental challenges in marginalized communities throughout the United States and abroad. Impact Experience works toward a four-step process: studying a community's needs with the help of local partners; bringing investors and local partners together to identify challenges and opportunities; building trust and developing actionable commitments; and following commitments through to completion. The end goal is to drive environmental and social regeneration in marginalized communities toward a more equitable and inclusive society.
